Profile Summary

Computer Science undergraduate with hands-on experience building responsive web applications (HTML, CSS, JavaScript) and interactive Power BI dashboards for sales and business analytics. Comfortable across the stack from front-end UI to data modeling and DAX, with a strong foundation in data structures, databases, and operating systems. Oracle Cloud-certified developer seeking an internship/entry-level role in web development or data analytics.

Education

Panjab University

Bachelor of Engineering in Computer Science

2023-2027

Hoshiarpur, India

Relevant Coursework

- Data Structures
- OOP
- Operating System
- Database Management
- Computer Networking
- Software Engineering

Experience

Web Development Intern — Oasis Infobyte (Jan 2025 - Feb 2025)

- Built responsive, cross-browser web pages using HTML, CSS, and JavaScript, translating design mockups into functional interfaces.
- Developed and deployed dynamic web applications end-to-end, from UI implementation to functional testing.
- Used Git and GitHub for version control, branching, and collaborative code management across project milestones.
- Debugged and refined live projects to improve application performance and overall user experience.

Projects

Personal Portfolio Website | *HTML, CSS, JavaScript*

[GitHub](#)

- Designed and developed a fully responsive personal portfolio website with a modular multi-section layout (Home, About, Skills, Services, Projects, Contact), with an emphasis on clean, intuitive UI/UX.
- Implemented interactive front-end features including smooth scroll-spy navigation, a sticky/fixed navbar, a mobile hamburger menu, and a dynamic Typed.js typing-effect animation to boost engagement.
- Added an animated Skills section with linear and radial progress bars, and a dedicated Projects showcase section highlighting key work with GitHub links.
- Integrated a fully functional AJAX-based contact form (FormSubmit API) with real-time loading, success, and error feedback — no page reload required.
- Managed version control and deployment through Git and GitHub, maintaining a clean, iterative commit history as the project evolved.

Blinkit Sales Dashboard | *Power BI, Power Query, DAX*

[GitHub](#)

- Built an interactive Power BI dashboard analyzing Blinkit's sales performance, outlet metrics, and customer ratings across product categories to support data-driven business decisions.
- Designed KPI cards and visuals — Total Sales, Average Sales, Items Sold, and Average Customer Rating — alongside breakdowns by fat content, item type, outlet size, outlet location, and outlet establishment trend.
- Cleaned, transformed, and modeled raw sales data in Power Query, then wrote DAX measures to power accurate, scalable reporting across a multi-page dashboard.

Super Store Sales Dashboard | *Power BI, Power Query, DAX*

[GitHub](#)

- Developed a Power BI dashboard to analyze sales performance, profitability, and customer purchasing patterns across a multi-category retail dataset.
- Built interactive views across Sales, Profit, Quantity, Category, Sub-Category, Region, Segment, Ship Mode, and Payment Mode to enable actionable business insights.
- Applied data cleaning, transformation, and modeling techniques using Power Query and DAX to ensure dashboard accuracy and scalability.

Technical Skills

Languages: C++, C, Python, JavaScript, SQL, HTML/CSS

Frameworks/Libraries: React, Angular, Next.js, Vue.js, Node.js, Express.js

Data Analytics: Power BI, Power Query, DAX, Microsoft Excel, Data Cleaning, Data Modeling, Data Visualization

Developer Tools: VS Code, Eclipse, Git/GitHub, Google Cloud Platform, GitHub Copilot

Certifications

- Oracle Cloud Infrastructure 2025 Certified Developer Professional – Oracle (Sep 2025)
- Data Analytics Job Simulation – Deloitte (Apr 2026)
